

EMERGENCY'S™

Trapezoidal backpack

EM13.019

Basic life support backpack/bag with trapezoidal shape, designed to carry out rescues or interventions in multiple scenarios, including areas of difficult access, mountain and / or confined spaces. Compartmentalized in its interior with 4 transparent window pockets, developed to house all the respiratory, circulatory, surgical and pediatric material. Its upper handle allows it to be transported in an agile and safe way, thanks to the four closing bands that complete its structure, as well as its hidden backpack straps at the bottom, which optimize its transport possibilities.
