Περιγραφή

ΤΕΕ-ΥΥ MASTER Θήκη Ζώνης Εξοπλισμού Πυροσβέστη

Extra large holster for high standards, specifically customized for firemen working with respiratory protection. With this holster you have all essential equipment in sufficient quantity directly at hand. Two medium-sized interior compartments provide sufficient space for a large torch, rescue scissors or knife, labeling markers or similar items. Two long holding lines with carabiner protect the equipment against loss. The main interior compartment can hold items such as rescue sling, HMS carabiner, notepad and pen. Timber wedges can be stowed in the four exterior elastic loops for immediate access. The Vario double-loop straps allow for the attachment to a firefighter belt, respiratory protection device or normal belt. Due to its large volume, the holster can also be used during technical assistance operations.

- size: 16 x 14 x 6 cm
- material: 370G TEC fire retardant
- item no. 2804
